DETAILED ACTION

1. Applicants' preliminary amendment filed June 25, 2004 is acknowledged and has been entered. Claims 1-18 have been canceled. Claims 19, 26-29, 31, 37-44, 46-48, 50, 57-60, 68, 71-74, 81, 90, 97 and 106 have been amended. Claims 19-112 are now pending in the present application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-36, 50-37, 81-89 and 97-105, drawn to method for treating a mycobacterial infection comprising administering an unmethylated CpG to a subject to treat or ameliorate a Mycobacterium bacterium infection, classified in class 514, subclass 44.
- II. Claims 37-49, 68-80, 90-96 and 106-112, drawn to method for inducing or inducing an immune response against a Mycobacterium bacterium comprising administering an unmethylated CpG to a subject to treat, prevent or ameliorate a Mycobacterium bacterium infection, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different methods have different modes of operation, and different effects or end results. The inventions are distinct methods, which differ in the method

objectives and end results. The end results of the different methods include, treating or ameliorating mycobacterial infection and inhibiting replication of a Mycobacterium bacterium (Group I) and treating, preventing or ameliorating a bacterial infection and protecting the subject against onset of disease or to decrease severity of symptoms of disease caused by infection (Group II).

This application contains claims directed to the following patentably distinct species: Applicants should elect a specific Mycobacterium and elect a specific sequence for the immunostimulatory nucleic acid molecule comprising an unmethylated CpG. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
